To [REDACTED]

Hi Monique,

Permission has to come from the insured to proceed. I am waiting on a mold estimate from your company.

I forwarded the mold report over to Rob this morning.

Water mitigation was already paid to another company on this claim. Any additional invoices/estimates regarding water mitigation should be directed to the insured.

Thank you

Notice of Project Stabilization Pending Completion of Inspections and Project Release

Good morning Homeowners Choice Property & Casualty Insurance,

Please allow this notice to service as our formal request for the confirmation of the conclusion of your inspection cycle, and your consent to begin demolition activities. It is our understanding that the insureds policy requires this release to meet their contractual obligation to permit any and all inspections as often as reasonably requested. We are submitting this request at the request of the insured so there is no miscommunication regarding these elements on the file. As I believe you can understand, they are hesitant to move forward incurring significant expense without the confirmation of Coverage.

Please be aware that we will continue stabilization activities on the property until these notifications are received.

We hope to hear from you soon.

With kindest regards,

David Sweet
